1 5W Solar Water Pump Inverter

Overview

Does a 1 hp submersible water pump need a solar inverter?

A 1 HP AC submersible water pump needs AC power/electricity to function. We can't connect it with the solar panels directly as DC electricity cannot be used to power these water pumps. Therefore, a solar inverter is also installed along with solar panels in this type of solar water pump.

How does a solar pump inverter work?

Solar pump inverter converts solar power (DC power) into AC power to drive AC water pump directly without solar panel Full automatic operation, no need programming, user-friendly Maximum power point tracking (MPPT) efficiency reach 99% with advanced MPPT algorithm Built-in booster with lower solar operating voltage to reduce solar panels costs.

Why should you buy a 1.5kw pump inverter?

The 1.5kW pump inverter is expertly insulated, dust-proof, and moisture-proof, ensuring all users' stable, safe, and reliable operation. The robust casing protects internal circuits and electronic components, ensuring the inverter's safety, stability, and reliability, effectively extending the product life.

How to choose a solar pump inverter?

It is recommended that the MPPT range be (250V, 400V), and support AC and DC input. With IP20 protection class, solar pump inverters work in temperature (-10°C, 40°C). The solar pump inverter's humidity is less than 95%RH, widely applied in agricultural irrigation, seawater desalination, etc.

What is usfull solar pump inverter?

USFULL solar pump inverter is full automatic, with MPPT algorithm built-in. USFULL inverter, passed strict efficiency testing, is an important part of solar pumping system. USFULL attaches great importance to customer demands, and tries earnestly to offer customized product solutions that make users

happier.

What is a 1 hp solar water pump?

A 1 HP solar water pump is a solar device that uses solar energy to pump water from a lower elevation to an upper elevation. The main purpose of the 1 hp water pump is to provide irrigation for agricultural fields and gardens, as well as domestic use. Solar powered pumps are an eco-friendly and sustainable solution for pumping water.
