

## ContainerPower Energy Solutions

# 200 million kWh energy storage solution

## Overview

---

What is a Megatron battery energy storage system?

Discover the MEGATRON Series - 50 to 200kW Battery Energy Storage Systems (BESS) tailored for commercial and industrial applications. These systems are install-ready and cost-effective, offering on-grid, hybrid, and off-grid capabilities. Here's why they stand out:

What is the best battery energy storage system?

Exploring the Differences Between On-Grid, Off-Grid, and Hybrid Battery Energy Storage Systems MEGATRON 50kW to 200kW Battery Energy Storage Solution is the ideal fit for light to medium commercial applications. Utilizing Tier 1 LFP battery cells, each commercial BESS is designed for a install friendly plug-and-play commissioning.

What solar systems work with Megatron battery energy storage systems?

Inquire Now! ATLAS Commercial and HERCULES Carport PV systems perfectly pair with MEGATRON battery energy storage systems. MEGATRON 50kW to 150kW systems can be paired with 50kW to 100kW's of PV. Each BESS has either 50kW or 100kW solar inverter integrated into the containerized system.

How does the energy storage system work?

Each energy storage unit is connected to the 35kV distribution unit of the booster station through a 35kV collector line and then boosted to 220kV via a 120MVA (220/35kV) transformer. The project is equipped with an energy management system (EMS) to receive grid dispatching commands and manage the charge and discharge of the energy storage system.

How safe is Tai'erzhuang ESS station?

Tai'erzhuang ESS Station adopts the Pow-erTitan energy storage system, which is the first system to pass UL 9540 and UL 9540A system-level safety standards certified by TÜV Rheinland in China. It achieved system safety.

Why should you choose Tai'erzhuang ESS power station?

With strong load-changes tracking, fast and precise PQ response, and a bidirectional regulation function, Tai'erzhuang ESS power station is a quality and flexible power source to participate in peak & frequency regulation and emergency backup, thus ensuring the safety and stable operation of the power grid.
