

## ContainerPower Energy Solutions

# 215 Liquid Cooling Energy Storage Cabinet Fire Protection Solution

## Overview

---

Jinko 215 Liquid-Cooled Integrated Cabinet integrates battery modules, BMS, PCS and fire protection equipment to offer a 1000V energy storage system solution for users. This system has a battery capacity of 215 kWh and can deliver up to 100 kW of power.

Jinko 215 Liquid-Cooled Integrated Cabinet integrates battery modules, BMS, PCS and fire protection equipment to offer a 1000V energy storage system solution for users. This system has a battery capacity of 215 kWh and can deliver up to 100 kW of power.

Jinko 215 Liquid-Cooled Integrated Cabinet integrates battery modules, BMS, PCS and fire protection equipment to offer a 1000V energy storage system solution for users. This system has a battery capacity of 215 kWh and can deliver up to 100 kW of power. The product is characterized by its flexible.

Stars Series 215kWh Cabinet ESS is a smart, modular energy storage system for C&I and microgrid applications. It offers high safety with multi-level BMS and fire protection, efficient thermal management, and fast, scalable deployment. A self-sufficient setup with an integrated multi-level BMS for.

The 215kWh battery is a plug-and-play, liquid-cooled outdoor energy storage cabinet. It combines battery cells, BMS, PCS, fire protection system, power distribution system, thermal management system, and energy management system into one unit. This helps you easily build a safe, efficient, and.

Vericom energy storage cabinet adopts All-in-one design, integrated container, refrigeration system, battery module, PCS, fire protection, environmental monitoring, etc., modular design, with the characteristics of safety, efficiency, convenience, intelligence, etc., make full use of the cabin.

The system has high energy density and saves land area. Pre-installed design, convenient transportation and installation, quickly shortening the construction period. The liquid cooling pipelines are non-uniformly distributed, effectively reducing the temperature difference between the cells in the.

The Outdoor Cabinet ESS is an all-in-one energy storage system featuring a 215kWh capacity and 768V voltage. It combines battery modules, advanced cooling, fire safety, and real-time monitoring in a compact design. Ideal for microgrids, PV-diesel hybrid systems, and EV charging applications. A.
