5G base station communications in 2025

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

Which region has the largest 5G base station market in 2024?

Asia Pacific registered dominance in the 5G base station market by holding the largest share in 2024. This is mainly due to the rapid expansion of the telecommunication sector, especially in emerging countries like India and South Korea. The region is likely to sustain a growth trajectory in the coming years.

How big is the Asia Pacific 5G base station market?

The Asia Pacific 5G base station market size was exhibited at USD 14.80 billion in 2024 and is projected to be worth around USD 278.42 billion by 2034, growing at a CAGR of 34.13% from 2025 to 2034. Asia Pacific registered dominance in the 5G base station market by holding the largest share in 2024.

What is the future of 5G infrastructure?

Major players include Huawei, Samsung, Nokia, Ericsson, and Cisco. As smart cities, IoT, and mmWave technology expand, the 5G infrastructure market will

continue strong growth, shaping the future of high-speed connectivity.

What will China do with the 5G push?

Alongside the 5G push, China will also start trials for 10-gigabit optical networks and optimize computing power centers amid an artificial intelligence (AI) boom brought on by ChatGPT.
