

## ContainerPower Energy Solutions

# Algeria Environmentally Friendly Energy Storage Power Supply Service

## Overview

---

What is Algeria's solar power supply chain?

The Algerian solar power supply chain grew significantly in the last decade and now seeks to add IPP development, engineering and design capabilities, EPC services, inverters manufacturing, storage solution manufacturing, universal certification expertise, and operations and maintenance services.

Why is Algeria a good country for solar energy?

With an estimated area of over 2.3 million km<sup>2</sup>, of which the Sahara represents 80%, Algeria enjoys a significant advantage, making it a substantial global reserve for solar energy. Thus, Algerian electricity users expect a reliable, affordable, and high-quality energy supply that is both sustainable and environmentally friendly.

How is energy used in Algeria?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Is Algeria a good place for green hydrogen production?

Algeria, with its abundant natural resources and remarkable solar energy potential, is well-positioned to emerge as a key player in green hydrogen production. The country's diverse geography and climate spanning sun-drenched desert areas and a temperate northern coastline offer a strong foundation for large-scale renewable energy endeavors.

Can Algeria harness solar energy for hydrogen production?

These results highlight the robust capabilities of Algeria's diverse regions in harnessing solar energy for hydrogen production. They emphasize the importance of considering northern Algeria as a viable production hub, offering competitive advantages in the global hydrogen market.

Does Algeria have solar power?

Regarding solar power potential, Algeria is home to some of the world's highest solar irradiance levels, with the capacity to generate 1,850 to 2,100 kilowatts per hour and up to 3,500 hours per year in its desert regions.
