

ContainerPower Energy Solutions

All-vanadium liquid flow battery sales revenue

Overview

The global vanadium redox flow battery market size was estimated at USD 394.7 million in 2023 and is projected to reach USD 1,379.2 million by 2030, growing at a CAGR of 19.7% from 2024 to 2030.

The global vanadium redox flow battery market size was estimated at USD 394.7 million in 2023 and is projected to reach USD 1,379.2 million by 2030, growing at a CAGR of 19.7% from 2024 to 2030.

The global vanadium redox flow battery market size was estimated at USD 394.7 million in 2023 and is projected to reach USD 1,379.2 million by 2030, growing at a CAGR of 19.7% from 2024 to 2030. The primary driver of this growth is the increasing global demand for large-scale energy storage.

The global All-Vanadium Redox Flow Batteries (VRFB) market continues to demonstrate robust expansion, with its valuation reaching USD 182.34 million in 2023. According to the latest industry analysis, the market is projected to grow at a CAGR of 7.30%, reaching approximately USD 278.28 million by 2030.

In October 2024, Enerox GmbH has been awarded investment in combined funding by the US Department of Defense Innovation Unit (DIU) to deploy its advanced megawatt-scale vanadium flow battery (VFB) and management system. In September 2024, VRB Energy has secured a USD 55 million investment, with USD.

The vanadium redox flow battery market generated an estimated USD 401.2 million in 2023. Further, it will grow at a CAGR of 9.7% in the forecast period (2024–2030), reaching USD 759.4 million by 2030. This is due to the growing demand for vanadium redox flow (VRF) batteries for microgrids and.

All Vanadium Redox Flow Battery by Application (Utility Facilities, Renewable Energy Integration, Others), by Types (Carbon Paper Electrode, Graphite Felt Electrode), by North America (United States, Canada, Mexico), by South America (Brazil, Argentina, Rest of South America), by Europe (United.

The global All Vanadium Redox Flow Battery market is projected to grow from

US\$ 23.4 million in 2024 to US\$ 70.4 million by 2031, at a CAGR of 17.3% (2025-2031), driven by critical product segments and diverse end-use applications, while evolving U.S. tariff policies introduce trade-cost volatility.
