# Armenia power generation container

LFP 12V 200Ah

## Overview

---

Armenia's thermal power stations (which supply approximately 24% of its electricity) run on natural gas, making Armenia (at the present time) dependent on imported Russian gas. Overview Energy in Armenia is mostly from . has no proven reserves of oil or and currently imports most of its gas from . The has the capacity to equal impo.

Before the USSR collapsed, oil imports made up about half of Armenia's primary energy supply of 8000 ktoe (compare to 3100 ktoe in 2016). Back then, oil made its way to Armenia via a direct rail.

Armenia was ranked 43rd among 125 countries at Energy Trilemma Index in 2018. The index ranks countries on their ability to provide sustainable energy through 3 dimensions: Energy security, Energy equ.
