Australia s energy storage projects in 2025

Overview

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in Australia, with six projects worth \$2.4 billion in total reaching the financial commitment stage – delivering an extra 1.5 GW in storage capacity and 5 GWh in.

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in Australia, with six projects worth \$2.4 billion in total reaching the financial commitment stage – delivering an extra 1.5 GW in storage capacity and 5 GWh in.

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in Australia, with six projects worth \$2.4 billion in total reaching the financial commitment stage – delivering an extra 1.5 GW in storage capacity and 5 GWh in energy.

Australia's energy storage market is undergoing a dramatic transformation. In the first quarter of 2025 alone, over AUD 2.4 billion (USD 1.5 billion) was invested in large-scale battery energy storage systems, marking the second-highest quarterly investment ever. These projects added 1.5 GW of.

Finnish energy giant Wärtsilä has announced the latest addition to its massive network utility-scale battery energy storage system (BESS) projects in Australia: a record-breaking 1.5 GWh deployment that brings the company's total energy storage capacity in the nation to 5.5 GWh. The future of.

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while battery storage systems expanded capacity by 2,936MW since Q3 2024. The Australian Energy Market Operator's (AEMO).

The Clean Energy Council's (CEC) latest Quarterly Investment Report: Large-scale renewable generation and storage Q1 2025 has revealed that the first quarter of 2025 saw six BESS (battery energy storage systems) projects deliver an extra 1.5GW in storage capacity and 5GWh in energy output. The.

This marks the second-highest quarterly investment on record, delivering an additional 1.5GW in storage capacity and 5GWh in energy output. The report highlighted a 500% increase in investment commitments for renewable energy generation in 2024. Credit: Phonlamai Photo / Shutterstock. The first.
