Bischi Italy solar Energy Storage Container

Overview

Who owns a battery energy storage project in Italy?

Tokyo-based developer Bison Energy Group has acquired two early-stage battery energy storage projects in Italy totalling 300 MW/1,200 MWh. The projects were purchased from a joint venture between ATLAS RE, a renewable energy developer, and Heron Advisory Srl, a firm specializing in renewable energy finance.

What is a Bess energy storage system?

BESS, or battery energy storage systems, are an essential element of the energy transition: the Enel Group is playing an important role in the growth of the sector, in Italy and in the other countries where it is present. There can be no real energy transition in Italy without electricity storage systems.

Is Italy a good place to invest in backup power?

In the third part of our series on backup power in Europe, we examine the lucrative BESS investment landscape of Italy. In part 1 of our series on backup power in Europe, we named Italy as one of the most attractive European countries for BESS investments.

Which projects have a battery energy storage system been implemented?

Internationally, we have already implemented major projects such as the Tynemouth stand-alone storage system in the UK and the La Cabaña photovoltaic plant in Chile, which is equipped with a Battery Energy Storage System that ensures its efficiency and stability.

How much Bess capacity does Italy have in 2025?

As of March 2025, Italy has got 1GW of grid-scale BESS capacity online, placing the country in third place in Europe (shared with Ireland) in terms of installed capacity, behind Germany (1.6GW) and the UK (5.6GW). Another 1.75GW is under construction, projects totaling 230MW have obtained

permits, and 1.2GW of new BESS capacity has been announced.

How much battery storage does bison energy need in Japan?

Bison Energy is targeting more than 2.4 GW/10 GWh of utility-scale battery storage in Japan by 2030. The company was awarded 240 MW across three projects in the second round of the Long-Term Decarbonization Auction (LTDA) for a total of 1 GWh of capacity.
