

ContainerPower Energy Solutions

Brazil energy-saving new energy storage application

Overview

China's Risen Energy is deploying containerized BESS units across Brazil's northeast—enough to power 70,000 homes during blackouts [2]. Local startups are aggregating rooftop solar + storage into Brazil's first VPP network, with 200MW planned by Q3 2026.

The Brazilian National Electric Energy Agency (ANEEL) is entering a new phase of dialogue on energy storage regulation. On December 10, 2024, ANEEL presented the results of the first phase of Public Consultation (CP) No. 39/2023 and announced the opening of a second phase for further contributions.

A recent study highlights that implementing energy storage technologies, such as lithium-ion batteries and pumped hydro, could lower Brazil's electricity system costs by up to 16% by 2029. These solutions are expected to improve system reliability and increase the integration of renewable energy.

New battery energy storage technology is gaining traction and promises significant savings on electricity bills. The storage of electrical energy in batteries has been gaining ground in Brazil, although there is still no definitive regulation for centralized generation. It is estimated that this.

Flexible generation and correlated solutions, including battery energy storage systems (BESS), are therefore likely to be at a premium in the future. Accordingly, in this article we delve into some key themes regarding the development and exploitation of battery storage solutions in Brazil.

The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. Credit: r.classen/Shutterstock. Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid, as reported by Reuters. The auction, to take.

Brazil's energy storage sector must attract R47 billion (\$7 billion) in investments by 2030, according to the Brazilian Energy Storage Solutions Association (Absae). Stakeholders are in the process of creating a regulatory framework for energy storage. The Brazilian energy storage market will be.
