

ContainerPower Energy Solutions

Business scope of independent energy storage projects

Overview

What are the emerging energy storage business models?

The independent energy storage model under the spot power market and the shared energy storage model are emerging energy storage business models. They emphasized the independent status of energy storage. The energy storage has truly been upgraded from an auxiliary industry to the main industry.

What business models are used in energy storage technology?

According to this review, the two-part tariff model, the negotiated lease model and the energy performance contracting model are traditional business models that have been practiced for a long time. The application of these business models to energy storage technology has achieved good results.

Can energy storage be a new composite business model?

Due to its flexibility, energy storage should be widely used in competitive models. The spot market is used as the carrier, and the energy storage in each application scenario is uniformly deployed through the shared energy storage business model. It can serve as a new composite business model for energy storage.

Are energy storage projects ready for a bright future?

In anticipation of a bright future, the first projects with energy storage are being set up. We have analyzed some of these cases and clustered them according to their position in the energy value chain and the type of revenues associated with the business model.

What is shared energy storage & other energy storage business models?

Through shared energy storage and other energy storage business models, the application scope of energy storage on the power generation side, transmission and distribution side, and user side will be blurred. And many

application scenarios can realize the composite utilization of energy storage according to demand.

Should energy storage business model be negotiated?

Negotiated lease and energy performance contracting business model can transfer risk and attract more capital into the energy storage market, which can buy time for a more rational energy storage business model.
