# Can I use the outdoor power supply in Malawi

## Overview

---

What type of plug is used in Malawi?

The power plug and outlet used in Malawi is the Type G plug. Type G plug has three rectangular pins arranged in a triangular pattern. What is the voltage and frequency in Malawi?

The standard voltage and frequency used in Malawi are 230 V and 50 Hz.

What voltage is used in Malawi?

The standard voltage and frequency used in Malawi are 230 V and 50 Hz. Travelers from countries with a standard voltage between 220 V and 240 V, such as in Australia, the UK, Europe, Africa, and most parts of Asia, can use electric appliances in Malawi without a voltage converter.

Can you use electric appliances in Malawi without a voltage converter?

Travelers from countries with a standard voltage between 220 V and 240 V, such as in Australia, the UK, Europe, Africa, and most parts of Asia, can use electric appliances in Malawi without a voltage converter. This is because manufacturers take slight deviations in voltage into account.

What is the access to electricity in Malawi?

Access to electricity in Malawi is very low, with domestic users accounting for around 25% of the total electricity consumption.

Who makes the rules for the Malawi Electricity Supply Industry?

The Malawi Energy Regulatory Authority makes a set of rules called the Grid Code for operation, dispatch and reporting of the Malawi Electricity Supply Industry.
