Canadian Energy Storage Battery Plant Project

Overview

Toronto, Ontario – May 7, 2025 – The Oneida Energy Storage Project has officially commenced commercial operations, becoming the largest grid-scale battery energy storage facility in operation in Canada and one of the largest globally. What is the largest battery energy storage facility in Canada?

May 7, 2025 – With 278 lithium-ion units now drawing and storing power from Ontario’s grid, the Oneida Energy Storage Project has officially entered commercial operation, becoming the largest battery energy storage facility in operation in Canada, and among the largest globally.

What is Canada's first battery energy storage facility?

TORONTO, May 7, 2025 – The Oneida Energy Storage Project (“Oneida”) has officially entered commercial operations, becoming the largest battery energy storage facility in operations in Canada, and one of the largest globally. Follow along for a behind-the-scenes look at building Canada’s first battery energy storage facility.

What is Canadian energy storage?

The blueprint for Canadian energy storage. Located in Haldimand County, Ontario, Oneida Energy Storage is a fully operational, 250 MW/1,000 MWh lithium-ion battery energy storage facility. It represents Canada’s largest operational energy storage facility, and is amongst the largest energy storage projects globally.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:.

Will Ontario's biggest energy storage plant spark a grid revolution?

Ontario will switch on the country's biggest energy storage facility next summer, taking a key step in transforming an aging electricity network aiming to be net-zero by 2035 — and one that could spark the grid revolution the province needs. Aerial view of the Oneida energy storage project, Canada's biggest battery plant, in southwest Ontario.
