# China s existing energy storage power stations

## Overview

---

Why did China's energy storage power stations expand in 2024?

A report from the China Electricity Council (CEC), released on March 29, titled "2024 Statistical Report on Electrochemical Energy Storage Power Stations," details this expansion. It notes that the total capacity more than doubled compared to the previous year, driven by larger projects, enhanced efficiency, and improved safety measures.

Why is energy storage important in China?

[Photo/Ren Yigang] As China accelerates the shift toward renewable energy and builds a new type of power system, energy storage has become indispensable.

What is China's Energy Storage plan?

The plan's target represents a significant scaling up, even for the world's leading adopter and producer of energy storage technologies. According to official National Energy Administration data from its recent 'China new energy storage development report 2025,' the country's installed base at the end of 2024 totalled 73.8GW/168GWh.

What is the energy storage demand in China?

Energy storage demand in China is without a doubt. Currently, China is carrying out the urbanization of centrality, intelligence, green and low carbon. Among them, the application of DG, smart micro-grid, EV, and the intelligent management of power grid all need energy storage , , , , .

Is building energy storage a viable option in China?

In addition, the opportunity of building energy storage in China is also analyzed , . However, because of the late start of China's energy storage industry, the comprehensive study for the whole industry is very few. We found a review which provided a relatively comprehensive analysis of the

technical and economic issue of it.

Where are energy storage units located in China?

Technicians check equipment at an energy storage station in Yongzhou, central China's Hunan province. [Photo/Lei Zhongxiang] On a mountain pass in Jiawa village, Qusum county, Shannan, southwest China's Xizang autonomous region, rows of energy storage units hum quietly beside a solar-storage power station.
