Communication Base Station Electrical Cabinet Company

Overview

Can a base station be built inside OUTD cabinets?

A whole base station can be built inside our OutD cabinets. Our OutD series includes multiple wall structure alternatives for protecting telecom equipment in the best possible way, from a single-layer wall construction with light and cost-effective design to a multilayer construction designed for more demanding conditions.

What materials can be used for a telecom pedestal enclosure?

Whether you need a telecom pedestal enclosure or a large cabinet with multiple doors, our team will create a design using your choice of stainless steel, carbon steel or lightweight aluminum. You can also choose from a wide range of optional features to include in your custom design, including:.

Why should you choose NEMA Telecom cabinets?

Dust and debris: Our products keep dust and foreign objects from interfering with your critical electrical systems, helping you avoid damage and interruptions. Moisture and corrosion: All of our NEMA telecom cabinets stop the rain, sleet, snow and ice from getting in, eliminating issues and losses caused by corrosion.

What are the different types of wall structure alternatives for telecom equipment?

Our OutD series includes multiple wall structure alternatives for protecting telecom equipment in the best possible way, from a single-layer wall construction with light and cost-effective design to a multilayer construction designed for more demanding conditions. Delta's patented multi-point locks deny intruders entry to the cabinet.

Why do I need a telecommunications cabinet?

These cabinets also make it easy for technicians to reach the ports they need

to expedite service. Patch panels: If your telecommunications system incorporates patch panels to connect and manage your incoming network cables, you can keep them safely stored in your cabinet.
