

ContainerPower Energy Solutions

Congo Kinshasa Energy Storage Power Station Project

Overview

What is the main energy resource of the Democratic Republic of Congo?

Hydroelectric power (See Annex 1) is the main energy resource of the Democratic Republic of Congo. The DRC ranks first in Africa in terms of its potential (100,000 MW), which accounts for 13% of the global hydropower potential.

Is the DRC a good power source in Africa?

The DRC ranks first in Africa in terms of its potential (100,000 MW), which accounts for 13% of the global hydropower potential. These resources are a great asset for the supply of low-cost power, making the DRC a strategic player in the continent's electrical energy industry.

Is the DRC a good place to export electricity?

These assets notwithstanding, the electricity sub-sector remains largely untapped. The DRC's 6% electrification rate is one of the lowest on the continent and the country does not fully benefit from the export possibilities of this resource.
