# Construction of wind solar and energy storage projects in the Republic of South Africa

## Overview

---

How many solar and wind projects are in South Africa?

The selection of the bidders is subject to value for money negotiations. Even though names have not been revealed, the department has revealed the bids cover four solar and four wind projects. Earlier this year, the South African government unveiled plans to deploy at least 3 GW of new renewables annually.

When will solar PV & wind projects be operational in South Africa?

The solar PV and Wind projects are expected to be operational end of 2026. They are being developed by a consortium of TotalEnergies Renewables South Africa (33.5%), its partner Mulilo (15.5%) and Reatile Group (51%). TotalEnergies has been present in South Africa since 1954, when it started distributing petroleum products.

Is the wind energy sector gaining momentum?

Indeed, the wind energy sector is gaining momentum as more projects go online as part of government's Renewable Energy Independent Power Procurement Programme (REIPPP). According to the South African Wind Energy Association (Sawea), South Africa leads the charge in Africa, accounting for 30% of the continent's 9GW of installed wind energy capacity.

Does ACWA Power have a solar reserve project in South Africa?

permitted projects. ACWA Power is therefore now completing Solar Reserve's Redstone project in South Africa. There were no new tower CSPs with thermal energy storage commercially bid on in the US after this incident. The problem was not so much the higher temperature of Tower CSP but rather a greater temperature differential wh.

Why is ENGIE launching a solar power plant in South Africa?

The announcement is as a result of the Department of Electricity and Energy's

(DEE) decision to reallocate unutilized onshore wind capacity under the bid window to solar. This comes after an initial appointment of preferred bidders in December 2024. Also read: [Engie Begins Construction on Grootspuit and Graspan Solar Power Plant in South Africa.](#)

How much does Redstone solar energy cost in South Africa?

At R11.6 billion, the Redstone project is the largest renewable energy investment in South Africa, and the project's electricity price is the lowest of any South African solar thermal project. Commencement of operations is scheduled for Q4 2023 and is expected to have an operational life of more than 30 years.
