Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia, and the Government of Egypt to.

Dubai-based developer Amea Power has agreed to build a 1 GW solar plant with a 600 MWh battery energy storage system (BESS) and an additional 300 MWh BESS. Meanwhile, Norwegian developer Scatec ASA has signed a 25-year power purchase agreement (PPA) for a 1 GW solar array and 100 MW/200 MWh BESS in.

Egypt's government has signed contracts with developer AMEA Power for two large-scale battery energy storage projects, the country's first. Dubai-headquartered AMEA Power announced yesterday (25 February) that it has signed government Capacity Purchase Agreements (CPAs) for the battery energy.

The company has signed Capacity Purchase Agreements to develop the first standalone battery energy storage stations in Egypt. There will be a 500MWh BESS project located in Zafarana and a 1,000MWh BESS project located in Benban. These projects will enhance grid stability and enable greater.

The International Finance Corporation (IFC), a member of the World Bank Group, announced a \$72 million investment in Egypt's first utility-scale battery energy storage system (BESS), marking a significant step in the country's

clean energy transition. Developed in partnership with AMEA Power and.

Dubai-based AMEA Power has reached financial close on Egypt's first-ever utility-scale battery energy storage system (BESS), a major milestone in the country's push to modernise its grid and increase renewable energy resilience. The 300MWh BESS facility, co-located with AMEA Power's operational.
