

## ContainerPower Energy Solutions

# El Salvador Huijue Solar Power Generation Home Bureau

## Overview

---

How much solar power does El Salvador have?

From pv magazine LatAm El Salvador's energy regular, SIGET, said this week that the country's total installed PV capacity reached 633 MW by the end of 2023. The nation's total installed power generation capacity now stands at 2.99 GW, with 638 MW from hydropower. Solar accounts for about 21.1% of the nation's electricity mix.

How can El Salvador boost low-carbon electricity generation?

To boost low-carbon electricity generation further, El Salvador can significantly benefit from expanding its solar energy infrastructure, which is already playing a vital role in the electrical landscape.

Where is El Salvador building its first solar energy plant?

Photo: CEL. San Salvador — The state-owned and autonomous Comisión Ejecutiva Hidroeléctrica del Río Lempa (CEL) of El Salvador will build its first solar energy plant in the country, in the municipality of Talnique, in La Libertad department in the country's southwest, around 30km (18.5 miles) west of the Salvadoran capital.

Why should El Salvador invest in solar energy?

By capitalizing on its geographical advantages for solar energy, El Salvador can increase its clean electricity supply, aligning with environmental goals and global energy trends.
