Emergency power supply home 220v inverter

Overview

What is a 220V power inverter?

A 220 volt power inverter converts direct current to conventional alternating current. It can be used to run electronic equipment when there is no normal power supply. Sam Stores stocks a wide range of power inverters to match your needs.

What is a 220V power supply?

This 220V power supply is equipped with PFC, short-circuit proof and protected against over voltage and overheating. This stabilized 220V power supply can provide DC power of up to 12A and an output power of 3000W. The output voltage is adjustable at the front between 37.5V and 260V, making the power supply suitable for many purposes.

What is emergency led driver power supply?

New integrated emergency led driver power supply combined with normal led driver function and emergency light function together. This emergency power kit is designed to convert a wide range of LED types (panel light, led down light, spot light, etc.) which makes Led lights can continue output 1~10w power when main power fail.

What is emergency power kit?

This emergency power kit is designed to convert a wide range of LED types (panel light, led down light, spot light, etc.) which makes Led lights can continue output 1~10w power when main power fail. It designed with high grade smart IC, which in order to make this kit stable operation, isolation circuit and no-load protection.
