# Energy storage capacity expansion projects

## Overview

---

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity.

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity.

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest.

Alpharetta, Ga., March 31, 2025 –Stryten Energy LLC, a U.S.-based energy storage solutions provider, today announced a new plan expected to expand its domestic manufacturing capacity to 24 Gigawatts to support American energy security and resilience. The plan focuses on increasing production across.

There are more than 8,100 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,300 major energy storage projects currently in the database, representing more than 104,000 MWh of capacity. The list shows that there are more than 180 GWdc of major.

San Diego Gas & Electric (SDG&E) announced today the California Public Utilities Commission (CPUC) has approved an expansion of the company's Westside Canal Battery Energy Storage facility in California's Imperial Valley. This expansion project will add 100 megawatts (MW) of energy storage capacity.
