

ContainerPower Energy Solutions

Estonian distributed solar inverter plant

Overview

What is the largest solar project in Estonia?

Together with our lead partner Connecto, Sunly, the project developer and investor, has awarded us the contract for the engineering and construction of the Risti 244 MW solar power plant in Estonia. This impressive solar project is currently the largest PV project in the Baltic States and in Estonia in particular.

Will Estonia get 244 MW of solar power?

A milestone for the energy transition in the Baltic States: 244 MW of solar power for Estonia! Great news from our Renewables business unit! Together with our lead partner Connecto, Sunly, the project developer and investor, has awarded us the contract for the engineering and construction of the Risti 244 MW solar power plant in Estonia.

Why should you install solar panels in Estonia?

The energy productivity of solar panels installed in Estonia is equivalent to the southern countries, as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park, starting from the design to the connection point, the construction of substations.

How much solar radiation does Estonia produce a year?

In Estonia, the amount of solar radiation is comparable to Central Europe; the average amount of radiation has an optimal slope and azimuth of 1100-1200 kWh/m², 85% of which falls between April and October. An optimally installed 1 kW PV plant produces 900 to 1000 kWh of energy per year.
