## Overview

---

How many GW of solar power is installed in France?

Overall, out of the 23.7 GW cumulative, 22.9 GW is located in mainland France. France needs to install more than 12 GW of new capacity between now and 2028, by when the government targets to achieve between 35.1 GW to 44 GW of cumulative solar PV capacity under its Multi-Year Energy Programme (PPE).

What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

Is France incorporating solar energy into its grids?

Numerous countries are incorporating solar energy into their grids to lower energy costs, prevent power losses, and more. And France is one of the leaders of the pack. According to CleanTechnica, data from the French government showed chart-topping growth over the first three quarters of 2024.

How big is the solar PV market in France?

(Photo Credit: SDES, France) The French solar PV market grew by 3.5 GW during 9M 2024, expanding the national total to 23.7 GW and representing 6.2% of the country's electricity consumption during this period, according to the country's Données et Etudes Statistiques or Data and Statistical Studies Department (SDES).

What percentage of France's energy consumption comes from solar panels?

Essentially, these numbers equate to 6.2% of all French energy consumption

coming from solar in 2024, which was a 9% increase from the first three quarters of 2023. If you were to install home solar panels, which of these factors would be your primary motivation?

Click your choice to see results and speak your mind.
