Future prices for battery energy storage

Overview

The global market for lithium-ion batteries is expected to remain oversupplied through 2028, pushing prices downward, as lower electric vehicle production targets in the U.S. and Europe outweigh rising demand for energy storage systems, Clean Energy Associates said Aug. 29.

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities. With demand for energy storage soaring, what's next for batteries—and how can businesses, policymakers, and investors.

BloombergNEF expects additions to grow 35% this year, setting a record for annual additions, at 94 gigawatts (247 gigawatt-hours), excluding pumped hydro. The bumper year will be followed by a compound annual growth rate of 14.7% through to 2035, with annual additions reaching 220 gigawatts/972.
