Gaochi Hybrid Energy Storage Power Station

51.2V
200Ah/300Ah
LiFePO4 battery

Overview

This station integrates the storage advantages of lithium and sodium batteries, broadening application scenarios for sodium-ion battery storage in China and accelerating the development of the new energy storage industry chain.

This station integrates the storage advantages of lithium and sodium batteries, broadening application scenarios for sodium-ion battery storage in China and accelerating the development of the new energy storage industry chain.

Baochi Energy Storage Station, China's first large-scale lithium-sodium hybrid energy storage station, starts operations in Southwest China's Yunnan Province on May 25, 2025. (Photo/CCTV News) China's first large-scale lithium-sodium hybrid energy storage station began operations on Sunday in.

The answer may come from the China Southern Power Grid, which has just unveiled a new energy storage project designed to do exactly that. The China-based company announced on May 26 that it has brought online the Baochi Energy Storage Station in Wenshan, Yunnan. This site is a national pilot.

A China took a significant step forward in its sustainability journey with the inauguration of the Baochi Energy Storage Station in Yunnan Province on May 25, 2025. This pioneering project combines lithium-ion and sodium-ion batteries, marking the country's first large-scale hybrid facility. With.

China just fired up a next-gen battery hub blending lithium and sodium in its latest energy leap. On Sunday, its first lithium-sodium hybrid energy storage station began operation, marking a major step toward hybrid battery storage at scale. Located in Southwest China's Yunnan Province, the Baochi.

Chinese state-owned grid operator China Southern Power Grid has switched on the country's first large-scale lithium-sodium hybrid energy storage station, a 200MW/400MWh behemoth combining both lithium-ion and sodium-ion battery technology. Located in the Yunnan Province of southwest China and.

China has officially launched its first large-scale lithium-sodium hybrid energy storage station in Yunnan Province, marking a significant step forward in its commitment to renewable energy and grid stability. The Baochi Energy Storage Station, operated by China Southern Power Grid, boasts.
