Georgia Commercial solar Energy Storage Power Station

Overview

Does Georgia Power have a battery energy storage system?

Georgia Power is already operating battery energy storage systems and has plans for more. The utility's 65-MW Mossy Branch BESS is located in Talbot County and began commercial operation in November 2024. Another 765 MW was authorized by the Georgia PSC and is projected to enter commercial operation in 2026, the utility said.

How many MW of energy storage does Georgia Power need?

Georgia Power is seeking 500 MW of energy storage with the ability to discharge for at least two hours, either standalone or with associated renewable resources, the utility said Tuesday. A draft request for proposals specifies the resources should be online in 2028 at the earliest and no later than the end of 2031.

Will Georgia Power build a solar power plant in 2022?

Earlier this month, the PSC approved five new utility-scale solar site power purchase agreements for Georgia Power, consisting of a total of 1,068 MW that will be built by third-party companies. Plans for the renewable generation were also included in Georgia Power's 2022 IRP.

Does Georgia Power have a solar solicitation plan?

The solicitation is part of Georgia Power's ongoing efforts to add renewables and bolster the reliability of its electric grid. Earlier this month, the PSC approved five new utility-scale solar site power purchase agreements for Georgia Power, consisting of a total of 1,068 MW that will be built by third-party companies.
