Georgia Energy Storage 15kW

Overview

Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Will Georgia Power offer more battery energy storage projects?

In that filing, Georgia Power signaled its intention to solicit bids for more storage- another 500 MW- in the near future. Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report.

When will Georgia's battery storage system come online?

The battery system is expected to come online as early as 2026 and is subject to regulatory approvals. "As we continue to build Georgia's clean energy future, battery storage systems play a vital role in how we will continue to serve our customers with clean, reliable energy for decades to come.

How many MW of new battery energy storage will be available?

An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in development at Fort Stewart Army Installation near Savannah, Georgia.

Why do Georgians need battery storage systems?

Battery storage systems part of plan to add renewable energy and help ensure reliability for Georgians.

Will a 100-hour iron-air battery strengthen Georgia's electric grid?

Form Energy and Georgia Power continue to collaborate to fully evaluate and demonstrate that the 100-hour iron-air battery technology will strengthen Georgia's electric grid against normal day-to-day, week-to-week, and season-to-season weather variability, in addition to extreme weather events.
