Germany s largest energy storage power station

Overview

RWE is building Germany's largest battery storage facility to date at the Gundremmingen energy site. The 400-megawatt plant will have a storage capacity of 700 megawatt hours and will use the nuclear power plant's existing grid connection, which is currently being decommissioned.

On October 29, 2025, German energy giant RWE held a groundbreaking ceremony for Germany's largest battery storage project at the Gundremmingen energy site in Bavaria. Bavaria's Minister President Markus Söder and RWE CEO Markus Krebber jointly attended this historic moment. Just four days earlier.

Power firm RWE has launched construction on a 400MW/700MWh BESS project in Bavaria, Germany, the largest being built in the country. The Germany-headquartered firm announced the start of construction on the project yesterday (29 October), in a ceremony attended by Bavarian Minister-President Dr.

RWE has officially begun construction of Germany's largest battery storage facility at its Gundremmingen site in Bavaria. The facility will feature 400 megawatts of power output with a storage capacity of 700 megawatt hours, utilising the existing grid infrastructure from the now-decommissioned.

RWE has started building Germany's largest battery energy storage facility at its Gundremmingen site in Bavaria, marking a major step in the company's

plan to repurpose former nuclear power sites for renewable energy use. The 400MW facility, with a total storage capacity of 700MWh, will use the.

The 400-megawatt plant will have a storage capacity of 700 megawatt hours and will use the nuclear power plant's existing grid connection, which is currently being decommissioned. RWE is investing. Where is Germany's largest battery storage facility?

Bollingstedt / Kirchheim near Munich, 5 June 2024. Germany's largest battery storage facility is now online and has been officially inaugurated. Since April, a 103.5 MW / 238 MWh storage system has been operating in Bollingstedt, Schleswig-Holstein, contributing significantly to the urgently needed energy transition.

What is Germany's electricity storage capacity?

They still make up the largest share of the electricity storage capacity in Germany; about 30 projects commissioned between 1926 and 2004 provide a total capacity of about 7 GW. The majority are operated by utilities and they principally provide time-shifted electricity supply and balancing energy.

Which energy storage system is most popular in Germany?

Sonnen was top of the pile for residential storage in Germany last year, according to EuPD Research. From pv magazine Germany. Demand for residential energy storage continued to increase in Germany last year, according to analyst EuPD Research, which estimated 65,000 rooftop-PV linked systems were installed.

How does Germany support the development of energy storage facilities?

The Federal Ministry for Economic Affairs and Energy, responsible for energy policy in Germany on the federal level, supports the development of electricity storage facilities. Under the Energy Storage Funding Initiative launched in 2012, funding for the development of energy storage systems has been provided to around 250 projects.

Where is energy storage located in Schleswig-Holstein?

Since April, a 103.5 MW / 238 MWh storage system has been operating in Bollingstedt, Schleswig-Holstein, contributing significantly to the urgently needed energy transition. The facility was developed by German-Norwegian

energy storage specialist ECO STOR in cooperation with EPW GmbH, a developer of large-scale storage projects.
