

## ContainerPower Energy Solutions

# Gravity-lift large energy storage power station

## Overview

---

(PSH) is the most widely used and highest-capacity form of grid-energy storage. In PSH, water is pumped from a lower reservoir to a higher reservoir, which can then be released through turbines to produce energy. An alternative PSH proposal uses a proprietary high-density liquid, 2+1/2 times denser than water, which requires a smaller (elevation.
