

## ContainerPower Energy Solutions

# High-voltage energy storage battery shipments

## Overview

---

In the first three quarters of 2024, global utility-scale energy storage cell shipments reached 180 GWh, up 49.4% YoY. The top five manufacturers, CATL, EVE Energy, Hithium, CALB, and BYD, dominate the market, with the top two holding nearly 55% combined share.

In the first three quarters of 2024, global utility-scale energy storage cell shipments reached 180 GWh, up 49.4% YoY. The top five manufacturers, CATL, EVE Energy, Hithium, CALB, and BYD, dominate the market, with the top two holding nearly 55% combined share.

InfoLink Consulting has launched its global lithium-ion battery supply chain database. According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipments reached 202.3 GWh in the first three quarters of 2024, up 42.8% YoY. The energy storage cell market.

According to SMM statistics, global shipments of energy storage battery cells saw significant year-on-year growth, reaching 334 GWh for the year. Among these, lithium iron phosphate (LFP) energy storage battery cells accounted for 317 GWh. Chinese energy storage battery companies performed.

In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, driving global energy storage system shipments to a record high of 71.5 GWh. AC Side: Sungrow Tops the List, BYD Energy Storage Enters Top Three The top five global.

On May 20, 2025, InfoLink Consulting released its Q1 2025 Global Energy Storage Supply Chain Database, reporting global energy storage cell shipments of 99.58 GWh, a 150.62% year-on-year increase, despite a 7.75% quarter-on-quarter decline. Policy-driven factors, including U.S. tariff impacts and.

The top 10 global energy storage battery cells shipments include well-known companies such as CATL, CATL, BYD, and EVE. Through continuous innovation and technological breakthroughs, they have become a leader in the energy

storage battery industry and have made important contributions to the.

If 2024 was the year energy storage went mainstream, 2025 is when it's hitting the gym and bulking up. Global energy storage battery shipments are projected to reach 392 GWh in 2025, up from 314.7 GWh in 2024 [2] [9]. That's like replacing every AA battery in your junk drawer with industrial-grade.
