

## ContainerPower Energy Solutions

# Home all-vanadium liquid flow battery solar storage

## Overview

---

What is a vanadium flow battery?

Vanadium flow batteries are ideal for powering homes with solar energy. Compared to lithium batteries, StorEn's residential vanadium batteries are: Homes with solar panels need batteries to store energy collected during peak sun times so it can be used later, when it's dark, overcast, or during inclement weather.

What is a residential vanadium battery?

Residential vanadium batteries are the missing link in the solar energy equation, finally enabling solar power to roll out on a massive scale thanks to their longevity and reliability. Residential vanadium flow batteries can also be used to collect energy from a traditional electrical grid.

Are StorEn residential vanadium batteries a good choice?

By offering the highest power density available with the smallest footprint and a modular architecture, StorEn residential vanadium batteries are well-suited for just about every home and installation requirement.

Do vanadium flow batteries decay over time?

Vanadium flow batteries do not decay over time, maintaining 100% capacity for the life of the battery. Vanadium batteries also have a lifespan of more than 25 years, which is longer than most lithium-ion batteries. They are also more cost-effective than lithium-ion batteries.

Are vanadium batteries flammable?

Vanadium solar-powered batteries are safe for residential use. They are non-flammable and non-explosive. The electrolytes used in vanadium flow batteries are also water-based, making them the safest battery technology available. Are vanadium batteries better than lithium-ion batteries?

Why are vanadium flow batteries better than lithium ion batteries?

Vanadium flow batteries are easier on the environment than lithium-ion batteries, as the vanadium electrolyte can be reused. This eliminates the need for additional mining. Vanadium flow rechargeable batteries reduce carbon emissions significantly compared to lithium-ion batteries. Vanadium flow batteries are also nearly 100% recyclable.
