# Household expenses for solar energy storage

## Overview

---

A home solar battery costs between \$10,000 and \$19,000, including installation. The average price per kWh is \$1,000 to \$1,500. Factors that affect the cost include location, battery size, and tax credits, like the 30% federal tax credit.

A home solar battery costs between \$10,000 and \$19,000, including installation. The average price per kWh is \$1,000 to \$1,500. Factors that affect the cost include location, battery size, and tax credits, like the 30% federal tax credit. Backup power needs and net metering can also influence.

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it.

The cost of home battery storage has plummeted from over \$1,000 per kilowatt-hour (kWh) a decade ago to around \$200-400/kWh today, making residential energy storage increasingly accessible to homeowners. This dramatic price reduction, coupled with rising electricity rates and growing grid.

Most solar battery storage systems cost \$10,000 on average, with most ranging between \$6,000 and \$12,000. Prices range from \$400 for small units to over \$20,000 for larger systems. Key cost factors include battery type, capacity, installation labor, and additional equipment. Investing in a solar.

**Understanding Battery Types:** Solar storage batteries primarily include lithium-ion and lead-acid types, with lithium-ion offering better efficiency and longevity but at higher costs (\$5,000 to \$15,000), while lead-acid options are more budget-friendly (\$150 to \$1,500) but have a shorter lifespan.

Trinity can customize a solar and battery system to fit within your budget, with affordable financing options to suit your needs. Get a free, customized quote from Trinity so you can evaluate and decide what works best for you. Adding battery backup when you go solar may be more affordable than you.
