How much does the Croatian energy storage project cost

Overview

The Government of Croatia is preparing EUR 500 million for the installation of batteries for storing renewable energy. Will Croatia build Europe's largest energy storage project?

Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured €19.8 million (\$20.9 million) to develop a 50 MW storage system, potentially extendable to 110 MW by 2024.

Is Croatia ready for solar energy storage?

"There is immense scope for energy storage in Croatia, predominantly for battery storage." GlobalData says that Croatia is now on target to meet its 36.4% renewable energy target by 2030. However, its recent investment in energy storage has not been accompanied by rapid solar PV development.

What is energy in Croatia?

Energy in Croatia describes energy and electricity production, consumption and import in Croatia. As of 2023, Croatia imported about 54.54% of the total energy consumed annually: 78.34% of its oil demand, 74.48% of its gas and 100% of its coal needs.

What is Croatia's energy package?

SARAJEVO, Feb 16 (Reuters) - The Croatian government has prepared a 4.8 billion kuna (\$725 million) package designed to offset the impact of rising energy prices on households, businesses and socially vulnerable groups, Prime Minister Andrej Plenkovic said on Wednesday.

How much does electricity cost in Croatia?

Croatia, September 2023: The price of electricity for households is EUR 0.150 per kWh or USD 0.160 per kWh. The electricity price for businesses is EUR 0.148 kWh or USD 0.158 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes.

How much solar capacity will Croatia have in 2022?

The country might only add 2.5 MW of new solar capacity in 2022, and another 19 MW next year, according to the consulting firm. The International Renewable Energy Agency (IRENA) says that Croatia had 309 MW of installed PV capacity at the end of 2021. GlobalData expects the country to reach 770 MW of cumulative solar capacity by 2030.
