How much is the solar power supply installed at home

Overview

The average cost of installing an average-size home solar system in 2025 is \$29,360 before federal tax credits and incentives [0]. The federal solar tax credit may reduce the net cost to \$20,552, and local incentives can further lower the cost. How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does it cost to install solar panels?

Although the overall cost of installing solar panels can surpass \$20,000, you may not have to cover the entire cost. Depending on where you live, you may be able to access federal, state, and local government programs:.

How much does solar cost per square foot?

The average system cost only drops by \$1,000 and the cost per square foot increases to \$12.83. Installing less solar will lower your cost but on a non-linear basis as there are a lot of fixed costs for installers to design, permit, and install your system.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does solar cost in California?

Divide annual kWh by ~1,200 (typical kWh/year per kW of solar in much of California). In California, expect \$2.75 – \$3.50 per watt before incentives (solar

panel cost in California). This gives your solar cost per square foot. Estimate your system size, price before and after incentives, and cost per square foot.

How much does a solar battery cost?

A good solar battery can cost over \$10,000 before federal tax incentives. For example, for a quote that we requested from Tesla, one Tesla Powerwall 3 with installation can run over \$16,500. 4. Purchasing method Paying for solar panels with cash is cheaper than financing the purchase.
