

## ContainerPower Energy Solutions

# Huawei Energy Storage Project Supplier

## Overview

---

HUAWEI Digital Power has signed a key contract with Sepco III for The Red Sea Project to provide 400 MW photovoltaic (PV) plus 1300 MWh battery energy storage solution (BESS), which is currently the world's largest energy storage project.

HUAWEI Digital Power has signed a key contract with Sepco III for The Red Sea Project to provide 400 MW photovoltaic (PV) plus 1300 MWh battery energy storage solution (BESS), which is currently the world's largest energy storage project.

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will be supplied by Huawei Digital Power. Image: Huawei Digital Power. Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power.

In 2022, our total capacity reached 5GWh, of which 4.2GWh was for residential energy storage, and the remaining 0.8GWh was for large-scale energy storage. By region, Europe accounted for most of the distribution, with Germany taking 15%, Italy 5%, and other parts of Europe comprising 53%. Australia.

One notable project is the collaboration with power utility companies to implement large-scale energy storage systems to support intermittent renewable energy sources, thereby addressing reliability concerns and optimizing energy management. 1. GLOBAL REACH OF HUAWEI'S ENERGY STORAGE VENTURES.

HUAWEI Digital Power has signed a key contract with Sepco III for The Red Sea Project to provide 400 MW photovoltaic (PV) plus 1300 MWh battery energy storage solution (BESS), which is currently the world's largest energy storage

project. The contract was announced at the Global Digital Power.

Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. Saudi Arabia's Red Sea Project is making headlines with the construction of the world's largest photovoltaic-energy storage microgrid. Featuring a 400MW solar PV system coupled with.
