Huawei installs solar panels in Armenia

Overview

Are solar panels legal in Armenia?

Consumers are allowed to install solar panels with total power of up to 150 kW, and may sell any surplus to electricity distribution company Electric Networks of Armenia (ENA). In Armenia, solar thermal collectors, or water-heaters, are produced in standard sizes (1.38-4.12 square meters).

What is solar power potential in Armenia?

Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank. The reason for this is that average solar radiation in Armenia is almost 1700 kWh/m² annually.

Which buildings have solar panels?

Example of buildings equipped with solar panels are the American University of Armenia generating enough power for the elevators and other uses, and the UN House in Armenia. A 55 MW utility-scale solar power plant will be built near Mets Masrik in Gegharkunik province, requiring an investment of about \$50 million.
