

## ContainerPower Energy Solutions

# Huawei s large energy storage plant in Thailand

## Overview

---

The Mahidol University project is the largest C&I PV+ESS power station in the Asia Pacific, comprising a 15 MW PV, a 600 kWh energy storage system, and optimizers.

The Mahidol University project is the largest C&I PV+ESS power station in the Asia Pacific, comprising a 15 MW PV, a 600 kWh energy storage system, and optimizers.

This project consists of 15 MW PV and 600 kWh ESS. The PV modules are installed on the rooftops of the campus's 41 buildings and are all equipped with optimizers. The ESS improves the PV self-consumption rate and provides backup power. It is estimated that US\$2.7 million in electricity costs can be.

Huawei is at the forefront of supporting Thailand's goal of achieving carbon neutrality by 2050 with its comprehensive digital power technology, including Ultra-fast Charging and Green Home Solutions. These solutions empower residents, industries and smart grids to transition seamlessly to clean.

□□ Summary Huawei unveiled the LUNA2000-215 Series—its first commercial & industrial (C&I) hybrid-cooling energy-storage system—at the C&I Future Energy Summit Asia Pacific 2025 in Bangkok on 30 April. The company positions the solution as safer and more efficient for factories, malls, and the.

Huawei is advancing its energy storage solutions through various initiatives: The Grid-Forming Smart Renewable Energy Generator Solution has successfully passed grid-connection tests, marking a significant milestone in integrating renewables into power systems<sup>1</sup>. Huawei's Smart Renewable Energy.

Thailand's 2024 power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS alongside solar panels and wind turbines. This could create new business opportunities for entrepreneurs if prices decrease or new technologies emerge for stationary batteries. Why.

Mahidol University is a century-old, renowned university located in southern

Thailand. It is endowed with Thailand's traditional wooden huts and temples, as well as modern libraries and laboratories. Seen from above, you can find rows of neatly arranged PV modules on the rooftops of the faculty.
