

## ContainerPower Energy Solutions

# Industrial and commercial energy storage bidirectional inverter

## Overview

---

What is a bidirectional energy storage inverter?

Bidirectional energy storage inverter is an inverter that can convert direct current into alternating current and alternating current into direct current, which is an important part of the energy storage system. What is the meaning of bidirectional energy storage inverters?

.

What is a bi-directional inverter?

The bi-directional inverter serves two purposes: It either feeds the DC bus to fulfill the demand or, it exports power back to the grid, when the charging station is lying idle or is needed to supplement the grid during peak hours. The key figures of merit for any power conversion block these days are:.

What is a CPS bi-directional power conversion system (PCS)?

The CPS bi-directional power conversion system (PCS) acts as the mediator between the generation source, the grid, and the battery rack for commercial energy storage applications. CPS is excited to introduce a turnkey battery storage inverter skid for utility energy storage systems.

How many inverters do you need for a 2 MW system?

The 2 MW system requires 22 inverters - which have also been developed to deliver full power during icy winters or high temperatures on the roof in summer. Don't worry about your energy costs. Rather put your energy into solutions for your customers.

Can a CPS battery be used with a single-phase hybrid inverter?

CPS is excited to introduce the 5-20 kWh modular batteries for use with CPS single-phase hybrid inverters to the North American market. The Power Leaf solution is scalable from 7.6 kW/5 kWh to 12 kW/20 kWh with up to four

stackable battery units when connected to the CPS single-phase hybrid inverters.

Does CPS offer a battery storage inverter skid?

The battery storage inverter skid is available in two standardized configurations: 2MW and 2.4MW, achieved by incorporating 10 and 12 units of CPS's 200kW string PCS inverters (CPS ECB200KTL/US-800), respectively. The battery storage inverter skid is compatible with CPS's 5 MWh liquid-cooling BESS (CPS ES-5016KWH-US).
