Overview

How will a Siemens substation help Iraq?

When fully commissioned, the substations will help to deliver enough power to the national grid equivalent to the electricity needs of more than two million citizens. In 2019, Siemens and the Iraqi Ministry of Electricity agreed on a roadmap to stabilize electricity transmission and distribution nationwide.

How will substations affect Iraq's power infrastructure?

The substations will strengthen the country's power infrastructure as part of an agreed roadmap for the electrification of the New Iraq. When fully commissioned, the substations will help to deliver enough power to the national grid equivalent to the electricity needs of more than two million citizens.

What improvements are being made to Iraq's communications infrastructure?

Improvements to the communications infrastructure in Iraq involve work on land and water. Soldiers from the 57th Signal Battalion and A/111th Signal Battalion pull fiber optic cable at Al Faw Palace Lake.

Why did the Iraqi government get a follow-up order from Siemens Energy?

Customer satisfaction with the Siemens Energy products and the joint project execution of the Dresden factory as well as the Siemens Energy team located in Erlangen, Abu Dhabi and Iraq paved the way for a follow-up order by the Iraqi government for the Al Hamudhia (north-west of Baghdad) region. It includes the supply of 10 additional transformers.

Why are cellular telephones so popular in Iraq?

Because the hardwired communications infrastructure has not matured, cellular telephones rapidly have become the primary means of communication for Iraqi citizens. In and around Baghdad, the demand for cellular telephones has been tremendous, the admiral says, and initially the provider had

difficulty satisfying it.
