ASTANA – Kazakhstan is set to launch a solar panel production line following the delivery of equipment within 1-1.5 months, Kazinform reported on Feb. 13, citing the Kazakh Ministry of Science and Higher Education. The initiative involves the establishment of a 50-megawatt plant for the production.

to its low cost and flexibility. The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will.
