# Kazakhstan solar power supply system monitoring

## Overview

---

What was the installed solar power capacity in Kazakhstan in 2018?

As of 2018, the solar power generation was 0.1 TWh and the installed capacity was 209 MW. Solar power generation in renewables energy is expected to meet the highest electricity demand on Kazakhstan's power grid.

Will solar power meet the highest electricity demand in Kazakhstan?

Solar power generation in renewables energy is expected to meet the highest electricity demand on Kazakhstan's power grid. As of 2018, the solar power generation was 0.1 TWh and the installed capacity was 209 MW. Indian solar PV EPC Company Sterling and Wilson expects to have 200 MW of capacity in Kazakh solar market by end of 2020.

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

Does Kazakhstan have solar power?

True, Kazakhstan has over 85 percent of Central Asia's total solar potential, according to a UN estimate. Yet Nazarbayev's ambition has been slow to meet reality: Four years later, Kazakhstan had only a modest 157 MW of installed solar capacity, about enough to power a small city. State capitalism in China then offered Kazakhstan a nudge.

What is Kazakhstan's largest solar project?

Kazakhstan's largest solar project – a 100 MW field in Saran, Karaganda Province – was opened last year by a German company, also with EBRD backing. Russian engineers doubled capacity at the EBRD-backed Burnoye

plant in Zhambyl in 2018.

Does Kazakhstan have a country Factsheet?

Specifically for Kazakhstan, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.
