Large-scale energy storage in Georgia

Overview

Georgia Power has broken ground on new battery energy storage systems (BESS) totaling 765MW across the state of Georgia, marking a major milestone in the utility's plans to meet rapidly growing electricity demand.

Georgia Power has broken ground on new battery energy storage systems (BESS) totaling 765MW across the state of Georgia, marking a major milestone in the utility's plans to meet rapidly growing electricity demand.

Earlier this month, Georgia Power Company submitted its 2023 Integrated Resource Plan Update (2023 IRP Update) to the Georgia Public Service Commission, which includes an Application for Certification for four battery energy storage systems totaling 500 MW. Georgia Power included attachments with.

Georgia Power has broken ground on new battery energy storage systems (BESS) totaling 765MW across the state of Georgia, marking a major milestone in the utility's plans to meet rapidly growing electricity demand. The construction, underway in Bibb, Lowndes, Floyd, and Cherokee counties, is part of.

Georgia Power is seeking 500 MW of energy storage with a minimum of 500 MWh to support its renewables expansion, as part of its 2022 Integrated Resource Plan (IRP). The new storage capacity will facilitate the integration of additional solar and wind resources into the grid, marking a significant.

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs. The facilities, which are scheduled to begin operation in 2026, total 765 megawatts of additional storage capacity.
