

## ContainerPower Energy Solutions

# Liquid-cooled energy storage power station container

Nominal Capacity

**280Ah**

Nominal Energy

**50kW/100kWh**

IP Grade

**IP54**

## Overview

---

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

How many volts does a container storage system use?

The world's largest rolling stock manufacturer says that its new container storage system uses LFP cells with a 3.2 V/314 Ah capacity. The system also features a DC voltage range of 1,081.6 V to 1,497.6 V. From ESS News.

What are the functions of the energy storage system?

The energy storage system supports functions such as grid peak shaving, frequency regulation, backup power, valley filling, demand response, emergency power support, and reactive power compensation. The 2.5MW/5.016MWh battery compartment utilizes a battery cluster with a rated voltage of 1331.2V DC and a design of 0.5C charge-discharge rate.

How much power does an energy storage container need?

Normal lighting requires a 380/220V power input. Evacuation signs with batteries are provided at exits. 3.8.4.2 Energy storage containers should use rock wool materials for thermal insulation design, featuring insulated wall panels, doors, floor, and roof to prevent the formation of thermal bridges that cause excessive heat loss.

What is a liquid cooling unit?

The product installs a liquid-cooling unit for thermal management of energy storage battery system. It effectively dissipates excess heat in high-temperature environments while in low temperatures, it preheats the

equipment. Such measures ensure that the equipment within the cabin maintains its lifespan.

What is a 5 MWh battery storage system?

The system also features a DC voltage range of 1,081.6 V to 1,497.6 V. From ESS News China-based rolling stock manufacturer CRRC has launched a 5 MWh battery storage system that uses liquid cooling for thermal management.
