

ContainerPower Energy Solutions

Lithuanian distributed energy storage equipment manufacturer

Overview

Lithuania-based manufacturer of solar panels and batteries SoliTek has launched a new commercial and industrial (C&I) energy storage system, SoliTek VEGA, featuring its proprietary AI-powered energy management system (EMS). The high-voltage system utilizes lithium-iron-phosphate (LFP) battery cells. How DH & C systems are being implemented in Lithuania?

Currently part of DH systems in Lithuania is installing and/or planning to install heat storage facilities, which will enable an increase the efficiency and enhance the living age of biomass-burning DH&C systems. These are mainly insulated hot water tanks and/or underground water tank storage.

What is Lithuania's energy strategy?

The Strategy has 4 main objectives - to ensure a secure and reliable supply of energy to all consumers, to achieve 100% climate-neutral energy for Lithuania and the region, to transition to an electricity economy and develop a high value-added energy industry, as well as to ensure the accessibility of energy resources for consumers.

What are the main sectors of RES development in Lithuania?

According to the National Energy Independence Strategy, there are three main sectors, where the development of RES is planned and accounted for in the National statistics of Lithuania: the electricity sector, the district heating/cooling sector, and the transport sector.

What are the transport networks of Lithuania?

The transport networks of Lithuania are part of the European single market and the driving force behind the competitiveness of markets. Transport according to the type of activities is divided into: roads and road transport; rail transport; water transport; and air transport.

How much wood is used in district heating in Lithuania?

The share of woody biomass (mainly wood chips and the renewable share of municipal solid waste) is currently over 85% of the fuel used in district heating in Lithuania. The revised Heat law ensures that municipalities can plan for the sustainable development of their heating sector over a longer period.

How much electricity does Lithuania generate?

According to Litgrid's (Lithuania's electricity transmission system operator) preliminary data, in the first half of the year 2024, the national electricity generation amounted to 3,783.4 GWh, of which RES accounted for 2,990.1 GWh.
