

ContainerPower Energy Solutions

Macedonia solar Power Supply System

Overview

The May Energy company completed the 55 MW photovoltaic plant in Novaci, making Macedonia the largest solar plant in the region. The Western Balkans has been slow to deploy solar energy, but the list of photovoltaic power plants is growing day by day.

EcoSync, in partnership with KTM Energy Solutions, is proud to announce the completion of a landmark solar project in North Macedonia. This collaboration represents a significant step forward in the country's clean energy transition, aligning with its national sustainability agenda and accelerating.

The prospects for investing in solar farms in North Macedonia are rapidly evolving, fueled by significant regulatory reforms and an increasing commitment to renewable energy. Following the implementation of the first renewable energy law in 2021, the nation has seen a remarkable surge in investor.

Oslomej Solar Power Plant in North Macedonia has added a 62 MW / 104 MWh BESS, marking Fortis Energy's move toward grid-firm hybrid solar operations by 2026. Link copied!Copy failed! The 62 MW BESS has enabled Oslomej Solar Plant to deliver on-demand power through advanced energy time-shifting.

The first large-scale solar plant in North Macedonia – financed with the support of the European Union, WBIF bilateral donors and the European Bank for Reconstruction and Development (EBRD) has been connected to the power grid and is already producing clean electricity. The 10MW solar plant, built.

pv Europe and industry association Solar Macedonia are working to advance the solar future of North Macedonia. With 900 MW of installed capacity, North Macedonia's solar sector is scaling rapidly, while battery storage is gaining momentum. Find out more in our daily focus, 15–18 September. North.

SolarSK has successfully completed the implementation of the Falishe solar power plant project with a capacity of 5.84 MW in North Macedonia. Our team delivered a full scope of works, including: installation and full commissioning (Full EPC). The Falishe project once again proves that SolarSK.
