Malaysia rooftop solar panel project

Overview

Malaysia's Community Renewable Energy Aggregation Mechanism (CREAM) was announced in February 2025. This government initiative is designed to maximise residential rooftop solar potential, enabling homeowners to lease or rent out their rooftops to third parties for solar power.

“ Housing developers in Malaysia are urged to install rooftop solar panels, aiding the nation’s net-zero emissions goal and enhancing energy efficiency for homeowners. Kuala Lumpur, 29th Oct 2024, 10.08am – Housing developers are being encouraged to include rooftop solar panels in new projects.

Malaysia has launched the Rooftop Solar Aggregation Scheme (RSAS), a transformative step in its solar energy journey. This innovative program aims to accelerate solar adoption and reduce carbon emissions by allowing property owners to rent out their rooftops for solar panel installations—a solution.

Malaysia has launched a rooftop solar leasing scheme to promote renewable energy and reduce electricity costs, especially for B40 and M40 households. The initiative allows homeowners to lease their rooftops for solar power generation. Third parties will aggregate multiple rooftops to supply green.

Malaysia's first rooftop aggregation initiative for solar systems is now live. The program allows homeowners to lease or rent their rooftop for solar generation, with the electricity produced sold to commercial and domestic customers

within a 5 km radius. Malaysia's Ministry of Energy Transition.
