# Management team responsible for energy storage projects

## Overview

---

What is teaming up to save energy?

Teaming Up to Save Energy is a “how-to” guide on building an energy management team. The guide discusses the structure, launch, and maintenance of an energy team. Examples from ENERGY STAR partner organizations and a checklist are provided to illustrate practices and help with implementation.

What does an energy team do?

The energy team is responsible for planning, implementing, benchmarking, monitoring, and evaluating the organizational energy management program. The team’s duties also include delivering training, communicating results, and providing recognition. This guide is designed to help organizations develop effective energy teams.

What is a team approach to energy management?

A team approach improves buy-in from all levels of the organization, which helps to ensure greater energy savings. Senior management needs to perceive energy management as part of the organization’s core business. The key is an energy team leader at the corporate-level who is empowered by support from the top senior management.

What is an energy team guide?

The guide discusses the structure, launch, and maintenance of an energy team. Examples from ENERGY STAR partner organizations and a checklist are provided to illustrate practices and help with implementation. This guide complements “Guidelines for Energy Management,” which is available online at .

What should a senior energy director do?

Presentations to Senior Management – The energy director, with the support

of a senior energy champion, should brief senior management. Team Strategy – A series of meetings of the energy team to prepare for the program’s official launch should be held.

How do energy management meetings work?

At the meetings, the team members report on their progress on assigned tasks and provide monthly reports on energy use so that the team can build up data. The meetings also offer opportunities for presentations on best practices by in-house and outside technical and operational experts.
