

ContainerPower Energy Solutions

Mexico containerized power generation

Overview

Does Mexico have a power generation expansion plan?

Share it! The Federal Electricity Commission (CFE) has approved a series of strategic investments totaling billions of dollars to modernize Mexico's power generation infrastructure. The government outlined its 2025-2030 Power Generation Expansion Plan, which includes 12 new power plants with a combined capacity of 5,840MW across nine states.

How much energy does Mexico have in 2022?

In 2022, the installed capacity of Mexico's clean energy plants (renewable and non-renewable) was 31,369 MW, which represented an increase of 1.81 percent in comparison to the previous year, when the installed capacity of clean energy accounted for 30,812 MW.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for $+45^{\circ}\text{C}$. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.
