ULAANBAATAR, MONGOLIA (30 October 2025) — The Asian Development Bank (ADB) has been engaged by the Government of Mongolia to provide transaction advisory services for the Stable Solar Energy in Mongolia Project, which aims to develop about 115 megawatts (MW) of solar photovoltaic capacity and 65 MW.

Mongolia is making significant advancements in renewable energy, with the government recently approving a large-scale project designed to export clean energy to Gulf countries. This initiative is part of a broader effort to transform Mongolia into a major exporter of renewable energy, leveraging.

[Huansheng New Energy Inner Mongolia 10GW solar project started construction] On September 24, 2024, TCL Zhonghuan's subsidiary, Huansheng New Energy Co., Ltd., officially launched a smart factory project with an annual output of 10GW of high-efficiency solar modules with a total investment of.

Huasun Energy has supplied its high-efficiency heterojunction (HJT) solar modules to the 200MW Xinhua Forest Farm Desertification Control and Photovoltaic Integration Project in Linhe District, Bayan Nur City, Inner Mongolia. The project combines renewable power generation with ecological.

According to DateBM, on January 15, the mass production launching ceremony of the first phase of Huansheng 10GW high-efficiency solar module intelligent factory project was held in Jinshan Hi-tech Zone, Saihan District, Hohhot City,

Inner Mongolia, marking the official completion and commissioning.

On Dec 18, the second phase of the Inner Mongolia Huadian Tengger Clean Energy Transmission Base's photovoltaic project, with a capacity of 1 GW, was connected to the grid in Alshaa League, North China's Inner Mongolia autonomous region. This marks the first project among Inner Mongolia's four.
