# Morocco assembles solar power generators for home use

## Overview

---

Can Morocco use solar energy?

The Noor Power Station in Ouarzazate is a big success, showing Morocco's ability to use solar energy well. Now, solar energy makes up 7% of Morocco's energy. But, the goal is to reach 20% by 2030. This shows a big step forward. Morocco is getting a lot of investment and help from other countries.

Will Morocco become Africa's solar energy pioneer?

Morocco's exceptional solar resources, reaching 2,264 kWh/m<sup>2</sup>/year in southern regions, position the country to become Africa's solar energy pioneer, new SolarPower Europe report reveals. Morocco's solar power capacity could surge from 0.32 GW to 4.35 GW by 2028.

What is a solar PV project in Morocco?

The 'Solar PV project in Morocco' project aligns with the following UN Sustainable Development Goals: Ensure healthy lives and promote well-being for all at all ages. Ensure access to affordable, reliable, sustainable and modern energy. Promote inclusive and sustainable economic growth, employment and decent work for all.

What is Morocco's 'Noor' Solar Energy Strategy?

This national strategy for Moroccan energy has big aims, hoping to raise renewable energy to 52% of capacity by 2030, the World Bank reports. Noor, the crown jewel of this strategy, is delivering on that promise. The technology developed in the Noor solar project also represents a leap forward for renewable sources and alternative energy usage.

What is Morocco's energy future?

It's a big step for Morocco's energy future. Morocco has set a goal to cut greenhouse gas emissions by 18.3% by 2030. With help, it could even cut emissions by 45.5%. These plans are key to Morocco's green energy initiatives

and its role in the world. The Ouarzazate Solar Power Station is a key project in Morocco's solar energy plans.

What does Morocco's solar power station mean for the environment?

The Ouarzazate Solar Power Station is a key project in Morocco's solar energy plans. It has a massive capacity of 580 MW. This is enough to power a city the size of Prague, showing Morocco's big step towards green energy. This station uses the latest technology. It shows how innovation and caring for the environment can go hand in hand.
